DETAILED ACTION

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Farrell on July 17, 2003.

The application has been amended as follows:

In claims 1 and 5, amendment dated Nov 22 2002, page 2, delete "A method for transmitting a character message in a mobile communication terminal during" -- insert "A method for transmitting a character message in a mobile communication terminal while maintaining".

Response to Amendment

2. Applicant's arguments, filed 5/29/03, with respect to claims 1 and 5 have been considered but are moot in view of the previous rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -
(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent,

Art Unit: 2684

or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Jonsson et al. (US Patent 6,385,585).

As to claim 1, Jonsson et al. disclose a method for transmitting a character message in a mobile communication terminal while maintaining a conversation by telephone (see col.10 lines 32-39), the examiner interprets "during an ongoing conversation" reads on "while maintaining conversation", comprising the steps of:

Setting the mobile communication terminal to a character message-transmitting/receiving mode while in a state in which a speech path has been established between the mobile communication terminal and a mobile communication terminal of a party other than the user (see col.3 lines 46-67); and

inputting a character message while in the character message-transmitting/receive mode, processing the written character message and transmitting the written character message in character format to the communication terminal of the other party via the established speech path in the character message-transmitting/receiving mode (see col.3 lines 1-12, col.5 lines 29-50, col.6 lines 30-42 and col.10 lines 32-35).

As to claim 2, Jonsson et al. disclose returning the mobile communication terminal of the user to a phone mode after the transmission of the character message to the mobile communication terminal of the other party (see col.11 lines 38-44).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jonsson et al. and further in view of Makela et al. (US Patent 6,301,338).

As to claim 3, Jonsson et al. fail to disclose the character message input during the character message-transmitting/receiving mode is selected among character messages previously written and stored in a registered state.

Makela et al. disclose the character message input during the character message-transmitting/receiving mode is selected among character messages previously written and stored in a registered state (see col.5 lines 44-51). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Jonsson et al. with the above teaching of Makela et al. in order to provide user conveniently to transmit pre-stored messages to other party.

7. Claims 4-5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jonsson et al. and further in view of Svensson (US Patent 5,687,216).

As to claim 4, Jonsson et al. fail to disclose receiving a character message from the mobile communication terminal of the other party, the mobile communication terminal displaying the received character message.

Art Unit: 2684

Svensson discloses receiving a character message from the mobile communication terminal of the other party, the mobile communication terminal displaying the received character message (see col.6 lines 8-9). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Jonsson et al. with the above teaching of Svensson in order to provide another message is received before the users reads the current message (as suggested by Svensson, see col.6 lines 1-7).

As to claim 5, the modified Jonsson et al. disclose all limitations as to claims 1 and 4 above.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
